

IDRISS JEMLI

Software Engineer — ERP & Business Intelligence, Data Engineering

+216 53 256 173 idriss.jemli@esprit.tn Ariana, Tunisia LinkedIn GitHub

Profile

Software engineer graduated from ESPRIT, major in ERP & Business Intelligence. Hands-on practice in data warehousing, ETL, business intelligence, machine learning and full-stack development. Public, documented projects on GitHub. Available immediately.

Education

National Engineering Degree in Computer Science — ERP & BI *ESPRIT — Tunis* 2021 – 2026
Graduated with highest honours and the jury's congratulations — Ranked 2nd/42.
Scientific Baccalaureate *Al Wafa High School, Ariana* 2020 – 2021

Professional Experience

Engineer — Final-Year Project, Data Engineering & BI *BIAT IT — La Goulette, Tunis* 02/2026 – 07/2026

- Full-stack KPI monitoring system for the card payment division: Power BI dashboards and automated alerting
- Star-schema data warehouse and machine learning anomaly detection across **over one million transactions**
- RAG assistant powered by an LLM, allowing users to query indicators in natural language
- Tools:** SQL Server, Python, Scikit-learn, Flask, Angular, Power BI, DAX, Docker, Git
- github.com/idrissjemli/biat-monitoring — public project, fully containerised

Client Advisor & Data Administrator *California Gym Tunisia — La Soukra, Tunis* 09/2025 – 02/2026

- Managed client contract and financial data in the company information system, with client advisory and follow-up

Engineering Intern — Full-Stack Development & BI *STEG — Tunis* 06/2025 – 08/2025

- Web application for intern management: CRUD, secure bcrypt authentication, change history
- Power BI dashboards for headcount reporting and monitoring
- Tools:** Flask, Angular, SQL, Power BI, bcrypt

Technical Intern — Data & Analytics *BIAT Insurance — Lac 2, Tunis* 06/2024 – 07/2024

- Multi-source data integration, business data cleansing, performance analysis and trend visualisation
- Tools:** SQL, Power BI, Excel

Introductory Internship *BIAT Insurance — Lac 2, Tunis* 07/2022 – 08/2022

- Business immersion: insurance processes, contract structures, claims handling

Projects

ETL Pipeline with Data Quality Handling *SSIS, SQL Server, Data Warehouse*

- Complete ETL chain: type conversion, normalisation, quality filtering, dimension lookup
- Valid records, motivated business rejects and technical errors separated into three distinct tables
- github.com/idrissjemli/ssis-etl-qualite-donnees

Distributed Data Processing *Hadoop, Java, Linux*

- Large-volume data processing in a distributed environment, with execution and administration under Linux

Full-Stack Web Applications *Symfony, Next.js / React, Django, MySQL*

- Database modelling, REST APIs, user interfaces and access-rights management

Technical Skills

Data & BI: SQL Server, T-SQL, ETL (SSIS, Talend), Data Warehouse, Star Schema, Data Modeling, Power BI, DAX.
ERP & CRM: SAP BW, SAP ABAP & Fiori, CRM.
Machine Learning: Python, Pandas, Scikit-learn, Anomaly Detection, RAG / LLM.

Certifications

- SQL Associate — [DataCamp](#)
- Cloud Foundations — [AWS Academy](#)
- CCNAv7 : Switching, Routing & Wireless Essentials — [Cisco](#)
- Introduction à la cybersécurité — [Cisco](#)
- Graph Developer, Associate — [Apollo GraphQL](#)
- Hashgraph Developer — [Hashgraph Association](#)
- AI for Everyone — [DeepLearning.AI](#)

Development: Flask, Angular, REST API, MVC, OOP, SQLAlchemy, TypeScript.
Tools & Methods: Git, Docker, Linux, Agile Scrum, Jira, Cloud (Azure, AWS).

Languages

- Arabic** — native
- French** — B2
- English** — B2
